I have small ears and mine just fit inside Sound wise they sound very good albeit a little bass heavy if listening to music.. First thing I noticed upon opening the headset was that it had a decent weight to it unlike other cheaper headsets ( HyperX Cloud Stinger) for example.

I have them all the way up and they still seem like they need more power. I did connect them to a Mixamp TR and they really shined.. HONEST, un-sponsored, and unbiased review of the Astro A40 gaming headset + Mixamp PRO.. That would be their overall volume when plugged into the dualshock 4 is pretty low.. I have owned various generations of both the A40 and A50 headsets so I was interested to try this sub \$100 headset from Astro.. Plenty of volume without distortion and very comfortable. Also the microphone quality is easily the best quality from Astro to date.. For gaming purposes they sound very good with one exception. Available in versions starting with a \$199 wired PC model, and going all the way up to \$279 for a wireless edition that works with gaming consoles, the A40 is one of the best gaming headsets available, with great surround sound, a good mic, and a comfortable fit. e828bfe731 [Free T Pain Autotune Download For Mac](#)
